1. Update of POSMS SMPs

All SMPs have now been updated to version 4.0. These updates include re-formatting of the structure to a more consistent layout and removal of duplicated text. The POSMS summary has also been updated. These changes do not impact the content of POSMS, only the presentational structure - further information can be found in the updates section of each SMP. A SEB will be issued to formally announce the changes in due course.
