1. Update to SSR Assignment Specifications within SEB003

During a recent Non-Statutory Inquiry (NSi) a recommendation was received to introduce a formal system of functional safety authorisation, delegation and accountability for hazardous material control in order to provide a clear line of responsibility and accountability for Statutory compliance below the ExCo. Hazardous Materials present a Risk to Life, to manage these it is considered a SSR responsibility to manage hazards associated with Hazardous Materials. The SSR Assignment Specifications within SEB003 have been updated to reflect this recommendation.

Please also note that SEB003 is undergoing a more comprehensive review and will be updated in due course.

Further details can be found on [SEB003](#) [1] located within [Supporting Documents](#) [2] on the ASEMS website.
